Activity 06 - Compare Microsoft 365 Copilot and Gemini Notebook

- Course: Infographics and Data Visualization with PowerPoint (TGS-2026064178)
- Duration: 45 minutes
- Tools: Microsoft 365 Copilot + Gemini Notebook + PowerPoint
- Output: Microsoft output, Gemini Notebook infographic and downloaded PPTX or PDF, comparison scorecard, reviewed final slide and prompt/source log

Objective

Generate the same source-grounded infographic brief in microsoft 365 copilot and gemini notebook, bring the gemini notebook deck into powerpoint through pptx download or a documented pdf rebuild route, and compare both routes before refinement.

Scenario

Northstar wants an executive infographic and short slide narrative summarising the sustainable-delivery pilot from a spreadsheet, policy note and stakeholder feedback summary. Run the same verified brief through Microsoft 365 Copilot and Gemini Notebook. Generate a Gemini Notebook Infographic plus Presenter Slides, preserve the deck as PPTX where available or PDF with a documented rebuild route, compare both routes and refine the selected master in PowerPoint.

Detailed instructions

1. Open the common brief. Open the A06 workbook, PROMPTS.md and source-pack folder. Complete the audience, objective, approved sources, verified claims, forbidden claims, infographic form, brand and accessibility rules.

2. Run the Microsoft route. In the Microsoft 365 Copilot app choose Create > Design an infographic, or use Copilot in PowerPoint. Add the approved file where available, submit the common prompt and save the generated option.

3. Run the Gemini Notebook route. Create a notebook, add only the approved source-pack files and select them. In Studio customise and generate an Infographic using the same audience, focus, style, orientation and evidence constraints.

4. Generate Gemini Notebook slides. In Studio select Slide Deck, choose Presenter Slides, set the language and length and reuse the common prompt. Generate and inspect the deck. Use the three-dot menu to Download PowerPoint (.pptx) when that option is available. If the interface exposes only PDF, download the PDF, keep it as evidence and rebuild decision-critical content as native PowerPoint objects rather than assuming the PDF is fully editable.

5. Preserve originals. Keep the Microsoft output, Gemini Notebook infographic PNG and downloaded Gemini Notebook PPTX or PDF unchanged as evidence. Work only on named copies.

6. Compare the routes. Use the Comparison sheet to score source grounding, factual accuracy, citations, hierarchy, visual quality, editability, brand, accessibility, speed and privacy fit.

7. Verify every claim. Compare every number, label and relationship with the workbook and source pack. Note that AI-generated infographics and decks may contain factual or visual inaccuracies.

8. Refine in PowerPoint. Choose the stronger direction. Rebuild decision-critical numbers, text, labels and charts as native objects; apply brand, source footer, alt text and correct reading order.

9. Record ownership. Complete the prompt/source log with both tools, selected sources, prompts, outputs, rejected claims, human changes, reviewer and final owner.

Suggested timing

- 7 minutes - Complete the structured prompt
- 8 minutes - Generate two options
- 10 minutes - Score and verify
- 15 minutes - Rebuild and check accessibility
- 5 minutes - Complete log and submit

Included inputs and assets

- Synthetic CSV and formula-enabled XLSX mock data
- Editable PowerPoint start and worked-example files
- PROMPTS.md with copy-ready data-analysis, infographic, Gemini Notebook and text-to-image prompts
- AI Prompt Lab worksheet for provenance and human-change records
- source-pack/ with synthetic metrics, stakeholder feedback, policy extract and source register

Submission

Submit the editable PPTX, completed XLSX, source CSV, prompt/source log, used assets and checklist. Record every AI tool, prompt, source, rejected claim and material human change.

Debrief

The final slide records the prompt, sources and human changes; all claims are verified and the decision evidence remains editable.
